

Plating Rinse Optimization

> **Maxi-Spray
Counterflow**

CONREC

**Reduce or eliminate drag-out
while minimizing the amount of rinse
water your process requires**

Maxi-Spray Counterflow Rinsing quickly removes process solutions from your parts right back to your process bath with the powerful flat-knife spray. Using Kontek's sustainable counterflow rinsing design, the Maxi-Spray pumps water from the following upstream rinse tank in line.

Close the loop with Maxi-Spray to complement your Max-Evap:

By incorporating rinsing techniques such as Maxi-Spray, the volume of rinse water required can usually be reduced to equal the process tank free board created by your Max-Evap.

Optimize your plating and rinsing process:

By combining Maxi-Spray and Max-Evap systems, our clients consistently:

1. Capture and recycle expensive chemicals
2. Evaporate water from the process solution
3. Increase bath concentration
4. Minimize costly waste treatment
5. Reduce operating costs
